PROFESSIONAL SUMMARY

Software Engineering student at Iqra University with software engineering internship and freelance development experience. Built an employee management system for a manufacturing client, delivered three live business websites, and developed web applications using C#/.NET, Python/Flask and Java. Interested in software engineering opportunities across backend, full-stack and application development.

TECHNICAL SKILLS

Languages: Python, C#, Java, C++, JavaScript, Bash, HTML, CSS
Frameworks: ASP.NET Core, Razor Pages, MVC, Flask, Entity Framework Core, jQuery
Databases & Tools: MySQL, SQL Server, SQLite, Git/GitHub, Docker, nginx
Engineering: REST APIs, MVC and layered architecture, authentication, CRUD, database migrations, Agile, SDLC, data structures and algorithms

PROFESSIONAL EXPERIENCE

Software Engineer Intern | Aug 2026 – Oct 2026
IT Department | Karachi, Pakistan

- Contributed to the design and re-engineering of an employee management system for a client organisation using ASP.NET Core, Entity Framework Core and MySQL.
- Worked on role-based access, REST API patterns, front-end and back-end debugging, and database migration tasks.
- Participated in requirement discussions, code reviews and sprint planning within an Agile team.

Freelance Web Developer | Ongoing
Independent | Remote

- Designed and launched three business websites for spa clients: NyZora Spa, Spanish Spa Rawalpindi and BellaSpa.
- Handled responsive page development, visual layout, content structure, custom-domain setup and deployment.

EDUCATION

BS Software Engineering | Oct 2023 – Present
Iqra University, Main Campus EDC | Karachi, Pakistan | Expected 2027
Certification: Front-End Development, IU-Core, Iqra University (Summer 2025)

SELECTED PROJECTS

AZHR ORBIT EMS — Client Project | C#, ASP.NET Core 9, EF Core, MySQL, REST API, Razor Pages

- Developed an employee management system for a manufacturing organisation with 806 employees and 18 departments, covering employee records, attendance, payroll, tasks and daily feedback.
- Implemented a 51-endpoint REST API, role-based cookie authentication, audit trail and department-scoped task management.
- Built attendance and payroll workflows, including Draft → Approved → Released payroll processing, using EF Core and MySQL.

Jarvis Banking AI Assistant | Python, Flask, HTML5, Docker, nginx

github.com/Zohaib2003pk/Jarvis-AI-assistant

- Built a Flask-based banking chatbot with REST API endpoints, SHA-256 token authentication and BFS/A* intent routing.
- Added input sanitisation, XSS prevention, CORS configuration and PII topic filtering; configured Docker deployment with nginx reverse proxy.
- Integrated browser-based voice input/output and structured request logging.

MediCore — Hospital Patient Flow & Bed Management | C#, ASP.NET Core 10, EF Core, SQLite

github.com/Zohaib2003pk/MediCore-City-Hospital-Karachi

- Developed an MVC application for patient intake, bed allocation and hospital workflow in a simulated city-hospital environment.
- Implemented database queries with EF Core/LINQ, bed-allocation logic and schema updates through migrations.

Transit-X — Transportation Booking & Route Management | C#, ASP.NET Core 10, SQL Server, JavaScript

github.com/Zohaib2003pk/Transit-X

- Built a transportation platform supporting seat reservations, bookings and route tracking.
- Used a layered MVC structure and EF Core migrations; developed a responsive Razor, CSS and JavaScript interface.

Client Business Websites | HTML, CSS, Responsive Design

- Delivered three live websites: nyzoraspaa.com, spanishspapindi.com and bellaspapindi.com, from requirements and page design through deployment.

ADDITIONAL ACADEMIC PROJECTS

InstaTerm Shell — Simulated a social-media feed in Linux using Bash, C, linked lists, queues and stacks.

Campus Navigator — Implemented Dijkstra's shortest-path algorithm in Java to model routes between campus buildings.
